

PAGALAVAN M

Frontend Developer | Mobile App Developer

pagalavan25surya@gmail.com • +91-6379328923 • linkedin.com/in/pagalavanM • Thanjavur, India

PROFESSIONAL SUMMARY

Angular Developer and Mobile App Developer with 2+ years of experience building scalable web and Android applications. Skilled in Angular, Ionic, TypeScript, and REST API integration. Built and delivered a live e-commerce platform with 500+ product listings, real users, payment integration, and an Android mobile app. Strong in component architecture, performance optimization, and Agile development

TECHNICAL SKILLS

Languages	TypeScript, JavaScript (ES6+), HTML5, CSS3
Frameworks	Angular 12+, Ionic 5, RxJS (Observables, Subjects), Angular Material, Bootstrap 5
Mobile Dev	Ionic 5, Capacitor, Android Studio (Android – single codebase)
Architecture	Component-Based, Lazy Loading, OnPush Change Detection, Reactive Forms
API & Auth	RESTful APIs, JWT Authentication, Razorpay, WhatsApp Business API, Google Maps API
UI/UX Tools	Figma, Responsive Design, Mobile-First, CSS Animations, Vanta.js
DevOps/Tools	Git, GitHub, Postman, Swagger, IIS Deployment, VS Code, Android Studio
Databases	MySQL, SQL Server
Methodology	Agile/Scrum, Sprint Planning, Code Reviews, Full SDLC

WORK EXPERIENCE

Frontend Developer | Thanjai Cloud Technologies — Thanjavur, India *Jan 2024 – Present*

- Developed 20+ reusable Angular components using RxJS and Angular Material, enabling scalable and maintainable architecture across modules
- Built core business features including billing, order tracking, and inventory management with secure REST API and JWT authentication
- Integrated Razorpay payment gateway and WhatsApp Business API for real-time transaction processing and customer communication
- Designed responsive, mobile-first UI using Bootstrap and CSS3, ensuring cross-browser compatibility
- Worked on Git/GitHub workflows including feature branches, pull requests, and code reviews within an Agile/Scrum team
- Contributed across the full SDLC from requirement analysis through QA and IIS deployment, reducing release cycle time by 20%

KEY PROJECTS

Smart Deal Zone — Multi-Vendor B2C E-Commerce Web Platform *Apr 2024 – Present*

Tech Stack: Angular 12, TypeScript, Bootstrap 5, REST API, MySQL, Razorpay, WhatsApp Business API, Google Maps API

- Led frontend development of a city-based multi-vendor e-commerce platform with 500+ active product listings and real users
- Built merchant onboarding with tiered subscriptions (Free / Standard / Premium) covering storefronts, product galleries, banners, and social media integrations
- Built end-to-end modules for merchants, service providers, and delivery partners, covering onboarding, dashboards, booking flows, and order management
- Developed real-time order tracking and KYC-based onboarding system for delivery partners
- Designed multi-zone delivery channel with sub-branch management, manual dispatch, full order audit trail, and failed-delivery re-attempt workflows with WhatsApp escalation

- Implemented COD workflows, payment integration, and admin dashboards for order and revenue management
- Improved initial load performance by 35% using lazy loading and OnPush change detection

Smart Deal Zone — Mobile Application (Android)

Sep 2024 – Present

Tech Stack: Ionic 5, Angular 12, TypeScript, Capacitor, REST API, Push Notifications, Android Studio

- Developed Android mobile application using Ionic and Angular from a single codebase, improving development efficiency and maintainability
- Implemented core features including cart, checkout, and real-time order tracking synchronized with backend services
- Built delivery partner workflow with push notifications, order updates, and proof-of-delivery using device capabilities
- Integrated cinema module with live showtimes, seat selection, and booking accessible across web and mobile via a unified API
- Optimized UI responsiveness across multiple devices using Ionic components and adaptive layouts

EDUCATION

B.Com Computer Applications (B.Com CA)

2018 – 2021

Annai Vailankanni Arts & Science College

Relevant Coursework: Data Structures, DBMS, Web Technologies, Computer Networks

CERTIFICATIONS & CONTINUOUS LEARNING

- Data Structures in C — Great Learning
- Basic Figma UX Design — Great Learning
- Active LeetCode practitioner in TypeScript — 90+ problems solved including backtracking (Subsets II #90), dynamic programming, and array optimization
